EXPERIENCE

Tech Trainee & Software Engineer Mecuryx · ***October 2025 – Present***

As a Software Engineer at Mecuryx, I work closely with the engineering team to build and maintain scalable software systems. I'm involved across the full development process — from system design and planning to testing and QA — making sure what we ship is reliable and performs well under real-world conditions. I collaborate regularly with product and engineering stakeholders to turn requirements into clean, well-structured solutions that are easy to maintain and built to grow with the product.

Software Engineering Intern Industrial Training Fund · Abuja, Nigeria · ***Nov 2024 – August 2024***

Completed a technically focused internship where I deepened expertise in backend engineering, gaining hands-on experience building scalable, high-performance systems using Go (Golang) — a language widely adopted in production grade infrastructure. Developed strong problem-solving capabilities by leveraging AI-assisted development workflows, learning to combine intelligent tooling with sound engineering judgement to produce clean, efficient code. This role strengthened my ability to work within structured institutional environments while tackling real engineering challenges at scale.

Software Engineering Intern Vivaking Technologies · Abuja, Nigeria · ***March 2025 – October 2025***

Undertook an intensive internship focused on full-stack web development, rapidly acquiring proficiency in both frontend and backend technologies. Gained practical experience building modern web applications using JavaScript, with a strong emphasis on React and Vite for developing fast, component-driven user interfaces. Applied newly acquired skills in a realworld engineering environment, demonstrating the ability to learn quickly, adapt to industry tooling, and contribute meaningfully to ongoing development efforts.

PROJECTS

Rejob — Job Listing Platform ***React · Vite · Tailwind CSS · Framer Motion*** ***February 2026***

Built a full-featured job listing platform that supports two distinct user roles — employers and job seekers. Job seekers can register, upload their CV or supporting documents, and apply to listed positions, while employers receive a clean, organised dashboard of applicants with the ability to download submitted documents or reach out directly. Focused on delivering a smooth, intuitive experience on both sides of the platform with polished animations and a responsive interface throughout.

Hauntr — A cli tool for organizing code base easily ***Commander, Chalk, Groq sdk, glob,ora*** ***February 2026***

Built a modern Node.js CLI tool that uses AI to automatically detect, explain, and suggest fixes for code issues across large codebases. Integrated OpenAI, Anthropic, and Groq models. Features include smart file scanning, configurable rules, and beautiful terminal output. (Node.js, ES Modules, Commander, OpenAI/Anthropic/Groq SDKs)

Construction-Hub — An E-commerce site for construction materials ***· Vite · Tailwind CSS*** ***March 2026***

Developed a modern, responsive web platform for the construction industry (built with React and deployed on Vercel), designed to streamline project management, collaboration, and resource sharing among professionals. Created an intuitive user interface that enhances workflow efficiency and provides a clean, professional experience for construction teams and stakeholders.

Cryptiq-wallet ***· Vite · Tailwind CSS*** ***March 2026***

Developed a sleek, modern cryptocurrency wallet web application (built with React & deployed on Vercel) that enables secure token management, seamless transfers, and intuitive blockchain interactions. Delivered a clean, responsive UI focused on user experience and accessibility for crypto enthusiasts.

Languages: English(Native),

Skills: Python, React, Vite, NodeJS, express, typescript JavaScript, SQL, Git, Github, Bash, tailwind Software development, Quality Assurance, Docker, Microsoft Office (Excel, Word, PowerPoint, Publisher) , Problem-Solving and Critical Thinking, Time Management, Teamwork and Collaboration, Reasoning Skills, Debugging and Code Optimization, Forex Trading and Market/Currency analysis.
